# INTERNATIONAL EXPERTS RECRUITMENT

---

The Company can provide highly qualified experts by sourcing from its permanent team combined with a flexible and efficient network of more than 5.000 international consultants having been collaborating with the company for years.

The experts data bank is composed of a blend of international and local experts who jointly participate to the execution of the services and who possess the required skills to implement the planned activities in a timely, efficient, and effective manner.

## Highly qualified experts for the key positions

SIM selects international and national experts, who not only possess the requisite professional knowledge and technical skills but who also have a thorough understanding of the operations of international funded projects (procurement and professional experiences with different IFIs).

The proposed Teams of experts can therefore count on high qualified professionals and our proposals are tailored for each specific position and assignment.

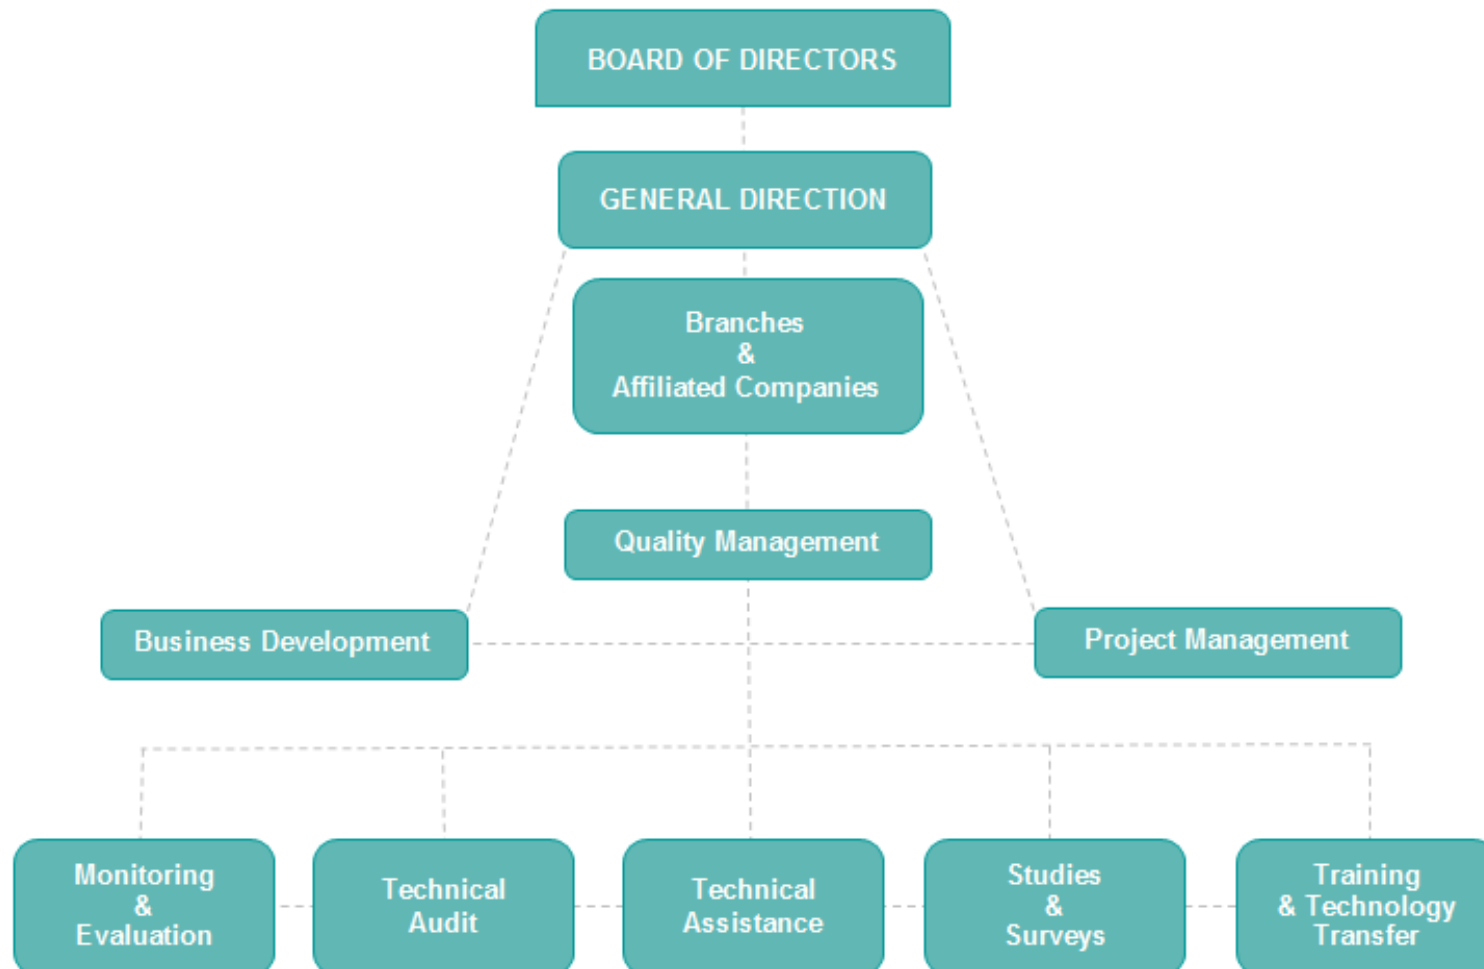

## Strong involvement of national experts

SIM undertakes itself to involve national experts in key roles within the projects. This will not only ensure that the project teams are fully cognizant of local conditions, policies and cultures; it will also facilitate communication with the beneficiaries and lead to a sustainable projects results.

SIM always combines teams of highly experienced and technically qualified national experts, who, in close cooperation with international experts, are able to assure the success of the project.
